

**Last Date of Abstract Submission for PG/Delegate Paper Presentation is 18 th
November, 2026**

Guidelines for Abstract Submission — Case Report/Case Series Category

1. Eligibility

- a) The participant(s) must register in OSI Conference 2026, Kolkata.
- b) The case should be related to dental implantology, implant surgery, implant prosthodontics, peri-implant tissue management, implant complications, esthetic implant therapy, bone/soft-tissue augmentation, digital implant dentistry, or related interdisciplinary management.
- c) The case should have adequate clinical documentation and, preferably, follow-up.

2. Title

- Concise and clinically informative.
- Preferably ≤12-15 words.
- Avoid unnecessary abbreviations and commercial product names.

3. Abstract Word Limit

- Maximum: 300 words
- Title, authors and affiliations may be excluded from the word count.
- Abstracts exceeding the prescribed word limit may be rejected or returned for correction.

4. Recommended Structure

I. Introduction

- Briefly explain the clinical problem and why the case is relevant or unusual.

II. Case Description

- a) Include only the important clinical details:
 - Patient age/sex
 - Chief complaint/relevant history
 - Clinical and radiographic findings
 - Diagnosis
 - Treatment planning
 - Implant/prosthetic considerations
 - Surgical/clinical procedure
 - Important biomaterials or techniques
 - Follow-up and clinical outcome

III. Discussion / Clinical Significance

- Explain why the case is noteworthy and what makes the treatment approach relevant.

IV. Conclusion

- State the principal clinical message or lesson from the case(s) in 1–2 concise sentences.

5. Authors

- Maximum 3 presenters permitted for each paper.
- The presenting author must be clearly identified.

6. Ethical Requirements

- a) Appropriate patient consent must be obtained for presentation of the case and clinical photographs.
- b) Patient-identifying information must not appear in the abstract, radiographs, photographs, or presentation.
- c) Any relevant conflict of interest should be declared.
- d) Commercial product names should be avoided unless clinically necessary; if mentioned, use the generic description and manufacturer where appropriate.

7. Submission Rules

- a) Abstracts should be submitted through the official conference submission portal before the announced deadline.
- b) Only original work should be submitted.
- c) The Scientific Committee has all rights to accept/reject the abstract if it violates any policies.

8. Keywords

- Provide 3–5 keywords, preferably using standard dental/medical terminology.

**Last Date of Abstract Submission for PG/Delegate Paper Presentation is 18 th
November, 2026**

Guidelines for Abstract Submission — Implant Research Category

9. Eligibility

- a) The participant(s) must register for OSI Conference 2026, Kolkata.
- b) The research should be related to dental implantology, implant surgery, implant prosthodontics, peri-implant tissue management, implant complications, implant esthetics, bone/soft-tissue augmentation, digital implant dentistry, implant biomaterials, implant biomechanics, or related interdisciplinary areas.
- c) The study may include clinical research, laboratory/in-vitro research, observational studies, comparative studies, retrospective/prospective studies, systematic reviews, or other scientifically relevant implant-related research, subject to acceptance by the Scientific Committee.
- d) The research should have a clearly defined research question/objective and appropriate methodology.

10. Title

- Should be concise, specific, and scientifically informative.
- Preferably ≤12–15 words.
- Clearly indicate the primary subject, intervention/exposure, population, or outcome where appropriate.
- Avoid unnecessary abbreviations and commercial product names.

11. Abstract Word Limit

- Maximum: 300 words
- Title, authors, affiliations, and keywords may be excluded from the word count.
- Abstracts exceeding the prescribed word limit may be rejected or returned for correction.

12. Recommended Structure

V. Background / Introduction

- Briefly describe the scientific or clinical problem.
- Mention the existing knowledge or gap that prompted the research.
- State the rationale for conducting the study.

VI. Aim / Objective

- Clearly state the primary objective or research question.

VII. Materials and Methods

- a) Include relevant details such as:
 - Study design
 - Study setting and duration, where applicable
 - Sample size and participant/sample characteristics
 - Inclusion/exclusion criteria, where applicable
 - Intervention, comparison, or experimental protocol
 - Implant/prosthetic/biomaterial variables studied
 - Primary and secondary outcome measures
 - Follow-up period, where applicable
 - Statistical methods used
 - For laboratory/in-vitro studies, mention the experimental model, specimens/sample size, groups, test methodology, and principal outcome measures.

VIII. Results

- Present the principal findings of the study.
- a) Where applicable, include:
 - Numerical results
 - Mean/median values
 - Effect sizes or differences between groups
 - Relevant confidence intervals
 - Statistical significance/P values
 - Avoid simply stating that results were "significant" without providing supporting data.

IX. Clinical Significance / Discussion

- What the findings mean clinically or scientifically.
- How the findings relate to implant dentistry.
- Potential implications for clinical practice, research, or future investigation.

X. Conclusion

- State the principal conclusion supported by the study findings in 1–2 concise sentences.

13. Authors

- Maximum 3 presenters permitted for each paper.
- The presenting author must be clearly identified.
- All listed authors should have made a meaningful contribution to the research.

14. Ethical Requirements

- a) For studies involving human participants, appropriate ethical approval/clearance should be obtained from the relevant Institutional Ethics Committee, wherever applicable.

**Last Date of Abstract Submission for PG/Delegate Paper Presentation is 18 th
November, 2026**

- b) Appropriate informed consent must be obtained from participants when required.
 - c) Patient-identifying information must not appear in the abstract, tables, photographs, radiographs, or presentation.
 - d) For animal or laboratory research, appropriate institutional and regulatory approvals should be obtained wherever applicable.
 - e) Any relevant conflict of interest and source of funding should be declared.
 - f) Commercial product names should be avoided unless scientifically/clinically necessary. When required, use the generic description along with the manufacturer, where appropriate.
15. Research Integrity and Submission Rules
- a) Only original research should be submitted.
 - b) The same study should not be submitted under multiple abstracts/categories.
 - c) All data presented should be accurate and supported by the study methodology.
 - d) Fabrication, falsification, plagiarism, or inappropriate manipulation of research data will result in rejection.
 - e) Studies with incomplete results may be considered only if permitted by the Scientific Committee; completed studies with relevant results are preferred.
 - f) Abstracts should be submitted through the official conference submission portal before the announced deadline.
 - g) The Scientific Committee reserves the right to accept, reject, or request modification of any abstract according to conference policies.
16. Keywords
- Provide 3–5 keywords, preferably using standard dental/medical and scientific terminology.

November, 2026**

Guidelines for Abstract Submission — Delegate Paper Presentation

Theme: Implant Dentistry
OSI Conference 2026, Kolkata

17. Eligibility

- a) The competition is open to Postgraduate students pursuing MDS
- b) The presenting delegate must be a registered participant of OSI Conference 2026, Kolkata.

18. The abstract should be related to Implant Dentistry, including but not limited to:

- Implant surgery and treatment planning
- Implant prosthodontics
- Implant esthetics
- Peri-implant tissue management
- Peri-implant diseases and complications
- Bone and soft-tissue augmentation
- Immediate implant placement/loading
- Digital implant dentistry and guided implant surgery
- Implant biomaterials and biomechanics
- Interdisciplinary implant therapy
- Emerging concepts and innovations in implant dentistry

19. Abstracts may be submitted under any one of the following categories:

- Original Research
- Case Report
- Case Series

20. Title

- The title should be concise, specific, and clinically/scientifically informative.
- Preferably limited to 12–15 words.
- Avoid unnecessary abbreviations and commercial product names.
- The title should appropriately reflect the nature of the research or clinical presentation.

21. Abstract Word Limit

- Maximum: 300 words
- Title, authors, affiliations, and keywords may be excluded from the word count.
- Abstracts exceeding the prescribed word limit may be rejected or returned for correction.

22. Recommended Abstract Structure

a) Original Research

XI. Background / Introduction

- Briefly describe the clinical or scientific problem and the rationale for the study.

XII. Aim / Objective

- Clearly state the primary research question or objective.

XIII. Materials and Methods

- Mention the study design, sample/participants, methodology, intervention or variables studied, outcome measures, and statistical methods where applicable.

XIV. Results

- Present the principal findings, preferably with relevant numerical data and statistical significance where appropriate.

XV. Conclusion / Clinical Significance

- State the principal conclusion and its relevance to implant dentistry.

b) Case Report / Case Series

I. Introduction

- Briefly explain the clinical problem and why the case/cases are relevant, unusual, or educational.

II. Case Description

a) Include relevant:

- Patient age/sex
- Chief complaint and relevant history
- Clinical and radiographic findings
- Diagnosis
- Treatment planning
- Implant/prosthetic considerations
- Surgical/clinical procedures
- Important biomaterials or techniques
- Follow-up and clinical outcome
- For a Case Series, common clinical characteristics and relevant differences between cases should be highlighted rather than providing excessive details for each case.

**Last Date of Abstract Submission for PG/Delegate Paper Presentation is 18 th
November,2026**

- III. Discussion / Clinical Significance
 - Explain the clinical relevance, challenges, treatment considerations, and learning points.
- IV. Conclusion
 - State the principal clinical message in 1–2 concise sentences.

23. Authors

- Only one presenter permitted for each paper.

24. Ethical Requirements

- a) For case reports and case series, appropriate patient consent must be obtained for presentation of the case and clinical photographs.
- b) Patient-identifying information must not appear in the abstract, radiographs, photographs, or presentation.
- c) For research involving human participants, appropriate Institutional Ethics Committee approval should be obtained wherever applicable.
- d) For animal or laboratory research, relevant institutional/regulatory approval should be obtained wherever applicable.
- e) Any relevant conflict of interest and funding should be declared.
- f) Commercial product names should be avoided unless clinically necessary. Where required, the generic description and manufacturer may be mentioned.

25. Originality and Submission Rules

- a) Only original work should be submitted.
- b) The same work should not be submitted under multiple categories.
- c) Research data presented in the abstract must be accurate and supported by the stated methodology.
- d) Plagiarism, fabrication, falsification, or inappropriate manipulation of data will result in rejection/disqualification.
- e) Abstracts should be submitted through the official conference submission portal before the announced deadline.
- f) The Scientific Committee reserves the right to accept, reject, reclassify, or request modification of any abstract according to conference policies.

26. Keywords

- a) Provide 3–5 keywords, preferably using standard dental/medical terminology.
